Muhammad Tharreq An Nahl

Frontend Developer & Product Engineer
Bandung, Indonesia | mtharreq@gmail.com | requixite.my.id | linkedin.com/in/mtharreq | github.com/mtharreqq

SUMMARY

Frontend developer and product engineer who designs and builds web interfaces end to end, from Figma to production. Builds enterprise apps at Telkomsigma with Next.js, React, and Vue, and designed and developed rantai.dev and its CMS. Focused on spacing, typography, interaction states, accessibility, and performance.

EXPERIENCE

Frontend Developer, PT Sigma Cipta Caraka (Telkomsigma)
Jan 2025 - Present | Bandung

- Build responsive interfaces for internal enterprise applications with Next.js, React, Vue.js, shadcn/ui, and Tailwind CSS.
- Lead UI/UX design for frontend features and turn Figma prototypes into production code.

Product Developer (Part-Time), RantAI
2025 - Present | Remote

- Redesigned and developed rantai.dev, the website of an AI company serving enterprise and government clients, from Figma to Vercel.
- Built a custom CMS with scheduled publishing, Academy books, team members, tags, and a post thumbnail designer, using Next.js 16, React 19, Neon Postgres, Drizzle ORM, and Tiptap.
- Implemented SEO and security: generated preview images, sitemap and RSS, JSON-LD, CSP and HSTS headers, and WCAG 2.1 AA checks with axe-core.

SEO Operator (Part-Time), Directorate of Information Technology, Telkom University
May 2024 - Jan 2025 | Bandung

- Improved search visibility of Telkom University websites.
- Automated website checks with Playwright.

Digistar Class 2024 Mentee, Hipster Role, Digistar Club by Telkom Indonesia
Aug 2024 - Oct 2024

- Designed the Pijar Mahir Enterprise use case, with insights and recommendations, as part of a cross-functional team.

Laboratory Assistant and Frontend Web Developer, i-Smile Laboratory
May 2023 - Jun 2024 | Telkom University

- Designed and developed the practicum website with Figma and React, including authentication and role management.
- Taught the Artificial Intelligence practicum and joined the Object Detection study group.

UI/UX Designer and Mobile Frontend Developer, KEDAIREKA
Jul 2023 - Dec 2023

- Designed a soil fertility monitoring app for Cibodas Botanical Garden in Figma and built its UI components in React Native.

PROJECTS

rantai.dev
Company website and CMS for RantAI. Design, frontend, and full-stack development. Next.js, React, Tailwind CSS, PostgreSQL.

requixite.my.id

Personal portfolio with scroll-driven motion, bilingual content (English and Indonesian), and accessibility support. Next.js, Framer Motion.

EDUCATION
